PROFILE

Final-year Computer Engineering student with experience in forward-deployed AI engineering, operational delivery, and team leadership. Builds practical workflow systems and translates ambiguous business problems into reliable data products. Seeking graduate opportunities in applied AI, software engineering, technical product, operations, and public-sector technology.

EXPERIENCE

AI Engineer Intern | StaffAny, Singapore

Jan 2026 – Jul 2026

- Forward-deployed with 3 F&B clients, translating labour-cost planning, overtime monitoring, payroll reporting, and timesheet-processing problems into scoped AI and data-automation workflows.
- Engineered AI-assisted document workflows from upload and storage through asynchronous extraction, validation, error handling, and human review for timesheets, schedules, claims, and onboarding documents.
- Designed and deployed a TypeScript Workspace API with domain-oriented employee, sales, and SPLH endpoints; defined access tiers and supported 10 trial users.
- Built a reusable Progressive Wage Model analysis workflow and projected-labour-cost calculator for a large F&B group.
- Extended Grimoire, an internal AI knowledge and workflow system, and delivered AI-enablement workshops for 30+ operators.

Lieutenant, Platoon Commander | Singapore Army

Jan 2023 – Jul 2023

- Led training and events for about 250 personnel; supported delivery of a school-level cohesion event for 1,200 participants.
- Developed soldiers through training, feedback, and standards-setting; participated in a bilateral military exercise.

LEADERSHIP & ATHLETIC ACHIEVEMENTS

NUS Dragon Boat | Member (AY2023/24–present); Captain (Aug 2024 – Aug 2025)

- As Captain, set training standards and developed team performance; earned 15 podium finishes and 2 championship titles across major races from 2023–2026.
- Team Manager, 15th IDBF Club Crew World Championships, Hualien (2026): coordinated school liaison and overseas-race delivery for a 40-athlete NUS contingent; NUS's 24U Open DB12 crew placed 4th in 200m, 500m, and 2,000m.

NUS Rowing | Member (AY2025/26–present)

- NUS placed 3rd overall at the 2025 Ulsan World Class University Rowing Festival.

NUS Canoe Sprint | Member (AY2025/26–present)

- K1 2,000m: 11th of 30 at Pesta Sukan 2025; 7th of 26 at Pesta Sukan 2026.

Assistant Dragon Boat Coach | St. Joseph's Institution, Singapore

Mar 2025 – Sep 2025

- Coached 10 athletes and programmed land training; crew placed 5th at the National School Games.

SELECTED PROJECT

Dragon Boat Performance Analytics | Independent project

In development

- Building a full-stack application for training sessions, paddler profiles, crew building, and DB12/DB22 validation using TypeScript, React, Vite, Express, and OpenAI Vision.
- Implementing multimodal extraction to normalise training and crew-list inputs, with deterministic fallbacks when AI services are unavailable.

EDUCATION

National University of Singapore | B.Eng. Computer Engineering; Second Major in Quantitative Finance

Expected May 2027 | CAP: 4.45/5.00

TECHNICAL SKILLS

AI & Data: LLM applications, OpenAI Vision, Gemini, OCR pipelines, prompt/workflow design, structured-output validation, evaluation planning. **Backend:** TypeScript, Python, Java, C/C++, REST APIs, Express, Fastify, Flask, asynchronous workflows, JSON, SQL. **Frontend & Engineering:** React, Vite, HTML/CSS, Git/GitHub, pnpm.
